

### RAW VEGAN PROTEIN

Made from sprouted wholegrain brown rice fermented using an all-natural enzyme process, Lifematrix Raw Vegan Protein Powder contains all essential amino acids in a high-potency 80% protein concentrate.

Soy-free, gluten-free and dairy-free, it's an easy-to-digest, hypoallergenic protein source for vegetarians/vegans as well as those with dietary restrictions. It's also a great protein source for athletes, even those hard-core meat-eaters and whey addicts!

Imported from the USA. GMO Free. Unsweetened and unflavoured.

Sizes: 400g and 1Kg

### YELLOW PEA PROTEIN

80% protein concentrate imade from yellow peas (pisum sativum) - an excellent protein option for vegans/vegetarians or anyone who cannot handle dairy proteins like whey.

Especially rich in Arginine and Lysine; it's also one of the plant kingdom's richest sources of Branched Chain Aminos.

Lifematrix Yellow Pea Protein Powder has a mild, neutral taste and is extremely versatile – it blends easily into smoothies, soups and stews.

Non-GMO. No additives, sweeteners. Produced by mechanical means only.

Sizes: 400g and 1Kg

### PEA & HEMP PROTEIN

Lifematrix Pea & Hemp Protein Powder provides a well-rounded amino acid blend. The amino acid profile of pea protein is somewhat low in the sulphur-containing aminos – cysteine and methionine – but hemp, which is rich in these aminos, helps balance that.

The pea/hemp combo delivers a 75% protein concentrate. Suitable for vegans and anyone who needs to increase their protein intake.

All Lifematrix protein powders are free of any additives; just pure protein. They can be used in smoothies, blended with juices or used to protein-enrich soups, stews and curries. They can also be used in baking.

Sizes: 400g and 1Kg

## WHEY ISOLATE PROTEIN

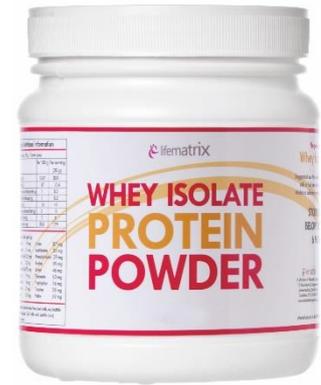

Lifematrix Whey Isolate is premium quality whey - it's 90% protein - with zero additives (no sweeteners, flavours or any other funny stuff).

Regarded as the Rolls Royce of proteins, whey isolate contains all essential amino acids including the key branched-chain aminos.

Whey isolate is low in lactose and easy to digest.

Imported from the USA. Certified kosher.

Sizes: 400g and 1Kg

## EGG WHITE PROTEIN

Egg whites are one of the highest-quality proteins available. They have a protein content >80% (equivalent to whey concentrate).

Egg white protein is easily digestible, making it an ideal alternative for people who cannot tolerate milk proteins. Egg whites contain an army of amino acids, including all nine essential aminos and the branched-chain aminos. Research shows that egg white protein has similar effects on stimulating muscle development as whey.

Lifematrix Egg White Protein Powder is manufactured in Belgium. The powder has a mild, neutral flavour. As with all Lifematrix protein powders, our Egg White Protein Powder is unsweetened and contains no additives.

Sizes: 400g and 1Kg

## COLOSTRUM

Bovine Colostrum (first cow's milk) contains an unprecedented combination of nutritional factors to fortify the immune system.

Colostrum's immune factors not only boost the under-active immune system, but work toward regulating the over-active immune system (allergies and auto-immune disease).

Colostrum's growth factors favour tissue repair, bringing many regenerative anti-aging benefits. These growth factors help build lean muscle tissue, burn fat for energy, increase protein synthesis, build and repair RNA and DNA, increase uptake of glucose and regenerate nerve, skin, bone and cartilage.

Lifematrix Colostrum Powder is imported from the USA.

Size: 100g

## PURPLE PROTEIN COLLAGEN

A blend of Peptan hydrolyzed bovine collagen imported France, with organic hibiscus flowers. Collagen is a key protein that ensures cohesion, elasticity and regeneration of skin, cartilage and bone, making it a valuable supplement for people with osteoporosis and arthritic conditions.

Collagen also has powerful anti-ageing properties, helping the skin to remain firm and youthful.

Size: 400g

## VEGAN SUPER-SMOOTHIE ESSENTIALS

Formulated to provide vegans (and anyone else) with a nutrient-dense quick drink or smoothie blend, "Essentials" uniquely combines high-quality plant protein with a combo of superfoods, pre-biotics and fibre.

We've formulated "Essentials" around our flagship Raw Vegan Protein (80% protein), made from wholegrain, sprouted brown rice with defatted-chia seed) which contains around 20% protein. Note that both rice and chia are gluten-free.

One serving of "Essentials" (20g) will provide 12g of high-quality protein.

"Essentials" also contains cacao powder, rich in anti-oxidants, good fat and magnesium as well as pineapple fibre to support gut transit and pre-biotics (inulin extracted from chicory) to promote healthy digestion.

"Essentials" can be used as quick, nutrient-dense drink – just add your favourite cereal milk (rice, soy, almond etc), or fruit juice, even water, or as the base for a "full-on" smoothie with added fruit and other goodies.

"Essentials" is unsweetened; it has a neutral/pleasant taste.

Sizes: 200g, 400g and 1Kg
